

01

MANDATE-GATED EXECUTION WORKFLOW

Start with an explicit human instruction.

"Using my isolated Coinbase Advanced portfolio, use exactly 5 USDC to buy ETH on ETH-USDC once now with a price-bounded IOC limit order. Partial fill is acceptable. Do not pay more than 50 bps above Coinbase's fresh best ask, more than 0.50 USDC in commission, or more than 5.50 USDC total. This authorization expires 2 minutes after I confirm it."

SOURCE INTENT DIGEST · 62f4c42794843b6deae2dcb89391058d5f6b5b97908e2fa4cd971159d27135ad

Why this is executable

- ✓ **Exact venue and pair**
Coinbase Advanced · ETH-USDC
- ✓ **Exact economic ceiling**
5 USDC principal · 5.50 USDC all-in
- ✓ **Exact order semantics**
BUY · price-bounded SOR limit IOC
- ✓ **Explicit validity**
One use · 120-second authorization
